

The Fight Against Climate Change, Together For The Protection of World Heritage

Sponsors: Indonesia, Italy, France

Preambles

- Recognizing the climate change is an important issue facing all countries across the world
- Understanding the fact that World Heritage Sites are essential the value of the nations and must be preserved
- Recognizing that policies are guiding principles that are not created to undermine legislative autonomy of individual nations and territories
- Recognizing that cultural heritage is not only physical historical landmarks, but it also comes in the forms of traditions, people groups, and unseen histories
- Developing a comprehensive understanding that plurality of collaboration creates more intelligent cohesion as presented by UNESCO [UNESCO 2019]
